Editorial Review: Nano-frontrunners; implications

Abstract

It is expected that nanomarket will increase to about \$3.7 trillion in 2015 (Research and Markets, Dublin 2008). The sales for 2008 could be as high as \$200 billion according to the same Research Markets Dublin 2008. As a result of this potential in nanoscience and nanotechnology; every academia, country or government institution and private sector wants to be part of the race. Like any race; results are important as a measure of success and learning process for those that are not winning or that want to be included. Patent is very crucial as a measure of success by countries involved.

Keywords: Global nano, nanoprogress, nanopatent, ranking
